Poetry (pōu·ĕtri). Forms: 4–7 poetrie, 5 -trye, -terye, 6 *Sc.* poyetrie, 5– poetry. [ME. = OF. *poetrie, poeterie* (13–14th c.), old It. *poetría* (Florio); ad. late and med.L. *poetrīa*, f. *poēta* poet.

Poetria occurs in a scholium on Horace *Epist.* II. i. 103, written (according to O. Keller, *Pseudacro*) *c* 650, perh. in North Italy, and preserved in MSS. of 10th c.; also in 9th or 10th c. MSS. of Martianus Capella. It is used as the title of treatises on the art of poetry, esp. the *Nova Poetria* of Gaufrei de Vinsauf (Galfridus de Vino Salvo, also called Galfridus Anglicus) about or soon after 1200; and in various works of the 13th c., as the *Græcismus* of Eberhardus Bethuniensis *c* 1212 ('Arte poetria fungor dum fingo poema'), the translation of Averroes' paraphrase of Aristotle's Poetics by Hermannus Alemannus *c* 1260, and the *Catholicon* of Joannes de Janua, 1286 ('a *poeta, poeticus*, et hæc *poetria* ars poetica'). (I. Bywater.) The relation of the word to L. *poētria*, Gr. ποιήτρια, poetess, is not clear; but, from its antiquity, its formative suffix cannot be identified with F. *-erie*, Eng. *-ery, -ry*, in such words as *chirurgery, drollery, bigotry, mimicry*. Our earliest English examples are from Chaucer, to whom the *Nova Poetria* of Galfridus was well known, as he makes the Nun's Priest refer to it in his Tale (l. 527) and apostrophize the author as 'O Gaufred deere Maister souerayn'.]

3. The art or work of the poet; a. With special reference to its form: Composition in verse or metrical language, or in some equivalent patterned arrangement of language; usually also with choice of elevated words and figurative uses, and option of a syntactical order, differing more or less from those of ordinary speech or prose writing.

In this sense, poetry in its simplest or lowest form has been identified with versification or verse: cf. quots. 1658, 1755.

W. MACKAIL (*Communicated*), In general, the essence of poetry as an art is not so much that it is rhythmical (which all elevated language is), or that it is metrical (which not all poetry is, except by a considerable extension of the meaning of the word), as that it is *patterned* language. This is its specific quality as a 'fine art'. The essence of 'pattern' (in its technical use, as applied to the arts) as distinct from 'composition' generally, is that it is composition which has what is technically called a 'repeat'; and it is the 'repeat' which technically differentiates poetry from non-poetry, both being (as arts) 'composition'. The 'repeat' may be obvious, as in the case of rhymed lines of equal length, or it may be more implicit, to any degree of subtlety; but if it does not exist, there is technically no poetry. The artistic power of the pattern-designer is shown in the way he deals with the problem of 'repeat'; and this is true of poetry likewise, and is probably the key (so far as one exists) to any technical definition or discussion of the art.

b. The product of this art as a form of literature; the writings of a poet or poets; poems collectively or generally; metrical work or composition; verse. (Opp. to *prose*.)

c. With special reference to its function: The expression or embodiment of beautiful or elevated thought, imagination, or feeling, in language adapted to stir the imagination and emotions, both immediately and also through the harmonic suggestions latent in or implied by the words and connexions of words actually used, such language containing a rhythmical element and having usually a metrical form (as in a); though the term is sometimes extended to include expression in non-metrical language having similar harmonic and emotional qualities (*prose-poetry*).

It has been conjectured that *point-blank* represents a F. **point blanc* meaning the *white point* or white spot on the target, but no such use is found in Fr., or in any Romanic lang. The phrase appears exclusively of English origin and use; and there is no evidence that in Eng. the 'blank' or 'white' was ever called the *point blank*. The probability therefore is that *blank* is here the sb. (BLANK *sb.* 2), and *point* the vb. (POINT *v.*^{1} 12), referring to the pointing of the arrow or gun at the 'blank' or 'white'; *point-blank* being a combination of the same class as *break-neck, cut-throat, save-all, stop-gap*, etc. It may have started as an adj., in *point-blank shot, distance, reach*, or *range*, i.e. that in which one *points* or aims at the *blank* or white spot.]

Obs.* or *arch.* Forms: see POINT *sb.*^{1}; 4–5 **devys**, 4–6 **devyse**, 5 **devis**, 5–7 **deu-**, **devise**, 6 **devyce**, 5– **device.** [Orig. in ME. phrase *at point devis, at poynt devys*, app. representing an OF. or AF. phrase **à point devis*, not actually cited in Old French, which had however both the advb. phrase *à point* 'to point, to the point aimed at, to the proper or utmost point or degree, to the point of perfection', and the word *devis*, as ppl. adj. The construction in *à point devis* requires the adj. sense, so that the phrase may be construed either 'to (the) point arranged', or, as *devis à point*, 'arranged to a proper point or degree, arranged properly or to perfection'. The latter appears to M. Paul Meyer the better construction of the words.

1. *Magnetism.* The quality or property possessed by certain bodies, as a lodestone or magnetized bar, of turning (when free to move) so as to point with their two extremities to the two (magnetic) poles of the earth; the quality of being polar, or possessing magnetic poles.

1646 SIR T. BROWNE *Pseud. Ep.* II. ii. 59 This polarity from refrigeration upon extremity and in defect of a Loadstone might serve to invigorate and touch a needle anywhere. 1664 POWER *Exp. 2. Hence in generalized sense: A property of matter or force, analogous or compared to that of a magnet or magnetism. **a.** The having of an axis with reference to which certain physical properties are determined; the disposition of a body or an elementary molecule to place its mathematical axis in a particular direction.

1674 PETTY *Disc. Dupl. Proportion* 128 All Atoms by their Motion of Verticity or Polarity, would draw themselves, like Magnets, into a streight Line, by setting all their Axes in *directum* to each other. 1827 ARNOTT *Physics* 33 When atoms are allowed to cohere according to their natural tendencies, they always assume a certain regular arrangement and form, which we call crystalline. Because in this circumstance they seem to resemble magnets, which attract each other only by their poles; the fact has been called the polarity of atoms. 1854 *Pereira's Polarized Light* (ed. 2) 184 In crystals it is necessary to admit, besides ordinary attraction and repulsion, a third molecular force called polarity. *Ibid.*, A molecule endowed with unequal attractive forces in different directions may be said to be possessed of polarity.

b. The quality of exhibiting opposite or contrasted properties or powers in opposite or contrasted directions; the possession of two points called poles having contrary qualities or tendencies.

I. 1. A modification of the condition of light or radiant heat, whereby the ray exhibits different properties on different sides, so that opposite sides are alike, while the maximum difference is between

two sides at right angles to each other; the production of this condition, the action of polarizing. See POLARIZE *v.* 1.

See Malus in *Nouveau Bulletin des Sciences* No. 42, March 1811, p. 252 *Lumière polarisée*. Also *ibid.* No. 45, June 1811, p. 292 (*transl.*) 'In giving to these sides [of the vertical ray] the name of *poles*, he calls the modification which imparts to light properties relative to these poles, *polarization*...This new expression .. signifies simply the modification that light has undergone in acquiring new properties, relative not to the direction of the ray, but solely to its *sides*, considered at a right angle, and in a plane perpendicular to its direction'. But this unfortunately assumed a sense of *pole* quite different from its use in astronomy, geography, and magnetism, with the consequence that *polarization* as applied to light and radiant heat has nothing in common with magnetic or electric polarization.

I. 1. *Optics.* (*trans.*) To cause the vibrations of light (radiant heat, etc.) to be modified in a particular way, so that the ray exhibits different properties on different sides, opposite sides being alike, and those at right angles to each other showing the maximum of difference.

A ray of polarized light is reflected in different degrees in different positions of the reflecting body, and transmitted by certain crystals in different degrees in different positions of the crystal, and (in each case) completely quenched in one particular position. This is accounted for by supposing the etherial vibrations to be restricted to one plane (*plane polarization*), instead of being, as in ordinary light, performed in all directions perpendicular to that of the ray. Light is also said to be *circularly* or *elliptically polarized*, or to undergo *circular* or *elliptic polarization*, when it exhibits (in a polariscope) certain colour-phenomena, or modifications of the phenomena of plane polarization, which are accounted for by supposing the etherial particles to move in circles or ellipses. Polarization is produced (variously in the case of different media) by reflection, or by ordinary or double refraction.

Pole, obs. form of Paul, Poll, Pool, Pulley.

-pole, combining element from Gr. *-πώλης* a seller, dealer (as in *οἰνοπώλης* wine-seller), f. *πωλεῖν* to sell, used rarely to designate a merchant, as in Bibliopole, Pharmacopole.

MDu. *polhamer* = poll-hammer, also a weapon of war. It does not appear whether the combination denoted an ax with a special kind of head, or one for cutting off or splitting the head of an enemy. In the 16th c. the word began to be written by some *pole-ax* (which after 1625 became the usual spelling), as if an ax upon a *pole* or long handle. This may have been connected with the rise of sense 2. Similarly, mod.Sw. *pålyxa* and Westphalian dial. *pål-exe* have their first element = pole. Sense 3 may be a substitute for the earlier *bole-ax*, which was applied to a butcher's ax.]

1. A kind of ax formerly used as a weapon of war, a battle-ax; also, a form of this retained till the end of the eighteenth century in naval warfare for boarding, resisting boarders, cutting ropes, etc.

It probably varied in form at different times, but originally (and in naval use to the end) it was a short-handled weapon, which could be hung at the saddle-bow or held under the shield, and used in close fighting: in the quot. from Chaucer it is one of the short weapons specially forbidden at the combat. Its use to render L. *bipennis* two-edged ax, in the Promptorium and Catholicon, and by Sandys, suggests that it had usually a cutting edge or point also on the side opposite the broad face.

2. A halbert or similar long-handled weapon carried by the body-guard of a king or great personage. (In quot. 1585 applied (as shown by the accompanying plate) to a small ax-blade on a long lance.)

The original *pollax* of the body-guard may have been the same weapon as in sense 1, mounted on a long staff or pole; but it became mainly an ornamental weapon, often gilt and of various fanciful shapes.

(The name *Commissioners of Police*, or *Police Commission*, was in the 19th c. given to the local bodies having control of the Police force in Burghs and Police Burghs in Scotland.)

Police office. The head-quarters of the police force in a city or town, as of the Metropolitan and the City police in London, at which the police business is transacted.

These formerly included a court-room in which offenders were tried, as well as a place of detention in which they were confined till trial; hence the name was formerly regularly applied to what is now called a Police court, and is still in many places applied to a Police station, when this has a place of detention. The earliest name was Public office (in Act of 1792). *Police office* appears to have been first applied to the Marine or Thames Police Office at Wapping. (See Police *sb.* 5, *Marine Police.*)

Seven additional police offices were established in 1792, by the act 32d Geo. III. cap. 53, and the Thames police-office in 1798. 1855 *London as it is to-day* 366 The City of London...There are two police offices, one in the Mansion House, where the lord mayor presides; and the other at Guildhall, where the aldermen sit in rotation. 1862 *Act* 25 & 26 *Vict.* c. 35 § 19 (Scotland) And may be taken into custody .. and detained in any police office or station house, or other convenient place. 1875 McIlwraith *Guide Wigtownshire* 95 On the ground-floor is also the police-office. 1882 Ogilvie (Annandale), *Police office, police station.* (So 1890 in *Cent. Gr. ἀπόδειξις a making known, demonstration, evidence, proof. Vegetius), registers, account-books, or from *pollex* thumb (as the supposed means of sealing a document), or from *pollicēri* to promise, are all untenable.]

Also called *bill of assurance* in Lumbard Strete in 1567 (Marsden *Sel. Pl. Crt. Admir.* II. 52). *Floating policy*, *open policy*: see quots. *Wager* or *wagering policy*, a policy of insurance taken out where the insured has no real interest in the thing insured: declared illegal by various statutes as a species of gambling.

P Johnson, as his only recognition of this word, has (1755) 'a warrant for money in the publick funds' (ed. 1785 adds 'a ticket'); and this is repeated in mod. Dicts. as a distinct sense; Mason (1801) drew attention to its incorrectness: 'Neither of these definitions extend to the most usual meaning of this word "*policy of insurance*". The interpretation should have been A warrant for some peculiar kinds of claim'.

Polka (pōuˈlkă), *sb.*1 [= Fr. and Ger. *polka*: of uncertain origin. The dance being of Bohemian origin (orig. called *Nimra*), it has been suggested that *polka* was a corruption of Czech *pulka* half, 'a characteristic featnre being its short half steps'. Another suggestion is that the actual form, whether or not altered from *pulka*, is due to the Polish *Polka*, fem. of *Polak* a Pole: cf. *polonaise* (also a dance), and *mazurka*.]

1. A lively dance of Bohemian origin, the music for which is in duple time.

Danced at Prague in 1835, at Vienna 1839, Paris 1840, London in the spring of 1842: see *Memoirs of Anna M. W. Pickering* (1903) xvi. *Polka-mazurka*, a modification of the mazurka dance to the movement of a polka.

Mus. Terms* 372/1 The polka was so popular that it absorbed every other dance for a time. Articles of food, of clothing and of ornament, were named after it. *attrib.* 1844 *Illustr. Lond. News* 11 May 301/1 You perform the galop waltz, substituting the Polka step just described.

They were played at Devonshire House ..the day of the grand fête. 1867 Miss Braddon *R. Godwin* I. i. 16 The guard's horn playing a joyous polka made itself heard among the trees.

3. On account of the popularity of the dance, *polka* was prefixed as a trade name to articles of all kinds (cf. quot. 1898 in 1); e.g. the *polka curtain-band* (for looping up curtains), *polka-gauze, polka hat*; **polka-dot,** a pattern consisting of dots of uniform size and arrangement.

1860 *Reader* 15 Sept. 796 Thus domestic pigeons may be said to be 'monogenous' as to their origin from one wild species, 'polygenous' as to the individual ancestor of each variety.

Polygeny (pŏlĭ·dʒĭni). [f. POLY- + Gr. -γενεια birth.] The (theoretical) origination of mankind (or of any species) from several independent pairs of ancestors; *loosely*, the theory of such origination, polygenism.

2. *Arith.* Applied to the several series of numbers, each beginning with unity, and obtained by continued summation of the successive terms of an arithmetical progression whose common difference is a whole number. So called because each of these numbers, represented (e. g.) by dots, can be arranged according to a certain rule in the form of the corresponding regular *polygon* (the term being here extended to a figure of any number of sides).

Thus the A. P. 1, 2, 3, 4, 5, 6 ... † **Pompelmoose, pampelmouse** (pǭmp-, pæmpĭlmūs). Forms: 7-8 pompelmoes, 7 pampelimouse, 8 pomplemose, pumplemus, 8-9 pompelmoose, 9 pompel-mos, pompelmousse, -mouse, -mons; pumple-, pamplemousse, pampelmouse; also 7-9 pumplenose, 8 pumble-, pummel-, pimple-nose. [A name which arose in the Dutch Indies in 17th c., and is given by early writers as the Dutch name of the fruit. Du. *pompelmoes* is recorded from 1676; F. *pampelimouse* (now *pamplemousse*) from 1696.

There is no native name in Malaysia resembling *pompelmoes*; the Javanese name is *djeroek*, the Chinese *yu.* In the opinion of Dr. Kern of Leiden, who has given special attention to oriental words, this is a compound, of which the second element is prob. *limoes* (in Fr. orthography *limousse*), a name applied to this fruit in Old Javanese, Malay, and Lampung, borrowed from the Pg. *limoes* pl. of *limão*, lemon, citron, under which the Portuguese included the species of *Citrus* found by them in the East. In Malay, *limu* or *limau* is still used in this general sense. The first element may prob. represent the Du. *pompoen* pumpkin, in reference to the large size of *Citrus decumana*, so that *pompelimoes, pompelmoes* may have been compressed forms of *pompoenlimoes*, i.e. 'pumpkin-like citron', an apt descriptive designation. The name *pompone* was actually applied to the fruit by Tavernier, *Voyages aux Indes*, Paris 1676, Eng. translation, London 1677; see POMPION 2. The corrupt Tamil *bambolmas*, given by Littré and Hatz.-Darm. as source of the Fr., with the more correct Tamil *pampalimāsu*, and numerous variants cited by Watson, Yule, etc., are merely corruptions of the Du. or Fr. form. The fruit is not native to India, but was introduced from Java (app. in the 17th c.), in Ceylon under its Dutch name; in Bengal its source is indicated by the designation *Batavī-nīmbū* or *nebū*, Batavian Citron.]

† Pomple, pumple. *Obs.* [Etymology unascertained.] Some kind of fodder for oxen used in the north of England in the 14th century.

One suggestion is that it was vetches (*Lathyrus sativus*) still commonly sown with oats as green fodder; another that it was a mixture of pease and oats, which was even in the 19th c. a common fodder in the district. But the season of the year in the one case, and the association with hay (*cum feno*) in the other, make difficulties.

S. played with balls numbered 1 to 15, the number of each ball a player pockets being added to his score.

In other cases, arrangements are made for a distribution of the traffic, each line agreeing to accept a specified proportion. This is called a 'Physical Pool'. 1887 *Pall Mall G.* 11 Oct. 12/1 Salt is the latest commodity placed under the control of a pool in the United States... [*Note.* In Eng. use this word has undoubtedly from the 18th c. been identified with POOL *sb.*[1]: see quots. 17..,1766 in sense 1, with their references to the *fish* in the *pool*. But the French use of *poule* for the same thing, with the fact that the French is found earlier, makes it almost certain that the term was taken from Fr., and associated with the Eng. word *pool*. F. *poule* is held to be a sense of *poule* hen, chicken, being perh. at first slang for 'booty, spoil, plunder'. Mme. de Sévigné in a letter of 29 July 1676 uses *poule* exactly in the sense of Eng. *pool*; and in a letter of 30 June 1680 says 'Si Denjean est de ce jeu, il prendra toutes les poules: c'est un aigle', a play upon the sense 'hen'. The Dict. of the Académie, ed. 1, 1694, and that of Furetière, ed. 2, 1701, also explain *poule* almost in the words in which it stands in the Dict. Acad. ed. 7, 1878: 'Poule se dit, à certains jeux, de la quantité d'argent ou de jetons qui résulte de la mise de chacun des joueurs et qui appartient à celui qui gagne le coup. *La poule est grosse. Mettre à la poule. Gagner la poule*'. There is perh. a similar relation between F. *fiche* a fish at cards, and the Eng. 'fish' in the 'pool'.]

Sc.* and *north. dial.* 4-6 pur, 4-8 pure, (4 puyre, 5 pwyr, poyr, 6 peur(e, pwir, puire), 6-puir(ŭ), (9 peer). [ME. *pov(e)re, pouere, poure*, a. OF. *povre, -ere, poure*, in mod.F. *pauvre*, dial. *paure, pouvre, poure* = Pr. *paubre, paure*, It. *povero*, Sp., Pg. *pobre*:—L. *pauper*, late L. also *pauper-us*, poor. The mod.Eng. *poor* and Sc. *puir* represent the ME. *pōre*: with mod. vulgar *pore*, cf. *whore* and the pronunciation of *door, floor.*

On account of the ambiguity of the letter *u* and its variant *v* before 1600, it is uncertain whether ME. *pouere, poure, pouer*, meant *pou-* or *pov-*. The phonetic series *paupere(n, paupre, paubre, pobre, poore*, shows that *povre* preceded *poure*, which may have been reached in late OF., and is the form in various mod.F. dialects. But the 15th and early 16th c. literary Fr. form was *povre*, artificially spelt in 15th c. *pauvre*, after L. *pauper*, and ME. *pōre* (the source of mod.Eng. *poor*) seems to have been reduced from *povre* like *o'er* from *over*, *lord* from *loverd*. Cf. also POORTITH, PORAIL, POVERTY. But some Eng. dialects now have *pour* (pɑur), which prob. represents ME. *pour* (pūr).]

Probably the med.Gr. and Arabic represent the earliest form, due to an imitation of the cry of the bird in some African or other barbarian language. The forms in *-gallus, -gallo, -gall, -gau*, appear to have been assimilated to L. *gallus* cock; the OF. *papegau* gave the Sc. *papingaw, papingo*.]

A mediæval Lat.-Gr. Vocabulary quoted by Du Cange has '*populia*, λύχνις'; but although cockle is now placed in the genus *Lychnis*, it is very doubtful whether this is connected with *popple. Cockle* (*cocle, kokkel*) and *popple* (*poppel*) have the appearance of parallel forms with exchange of consonants. On the other hand, this plant appears to have been sometimes included under the name *popy* (see POPPY 2), and conversely the name *popple* is now in some districts (esp. Cumberland and Yorkshire) applied to the corn poppy; so that the names may possibly have been originally related, *popil* being a derivative either of *popi, popy*, or of one of the Romanic representatives of *papaver*: see POPPY. L. *spīnus,* Sp. *espin,* OF. *espin* a thorn-tree). The genesis of the compound is not very clear, unless it began as short for *porco spinoso*:—L. type **porcus spīnōsus* spiny or prickly pig. The β, γ, and δ forms appear to be English corruptions, due to imperfect apprehension of the foreign word, and to 'popular etymology' identifying the ending with *pen, point,* etc.; the type *portepyne* may have arisen out of F. *por(c) d'épin,* with *c* mute. The ε forms really represent a different compound, viz. Pore (pōəɹ), *v.* Forms: 4 pure, pouri, 4–5 poure, 5–7 powro, 6 poor, 6–8 poar, 5– pore. [ME. *pūren, pouren, pouri*, of obscure origin. †**Porphyro·genite.** *Obs.* exc. in L. form **porphyroge·nitus,** fem. **-a.** Also 7 **-genete.** [ad. med.L. *porphyrogenitus*, ad. late Gr. *πορφυρογέννητος*, f. Gr. *πορφυρο-*, comb. form of *πόρφυρος* purple + *γεννητός* born. So F. *porphyrogénète* (Balzac 1635).] Originally, one born of the imperial family at Constantinople, and (as is said) in a chamber called the *Porphyra* (*πυρφύρα*). Hence, a child born after his father's accession to the throne; and in more general or vague sense, = One 'born in the purple': see PURPLE *sb.*

The actual origin of the name *Porphyra* is disputed.

1614 SELDEN *Titles Hon.* 82 There he found Irene the Empresse,..in a house anciently appointed for the Empresses childbirth...They call that house, *Porphyra*, whence the name of the *Porphyrogeniti* came into the world. 1619 PURCHAS *Microcosmus* lxxxi. 788 Not in a Palace prepared, (as the *Porphyrogeniti* had in Constantinople)..but in an Inne! *a* 1662 HEYLIN *Laud* (1668) 145 Purple is the Imperial and Regal colour, so proper therefore unto Kings and Emperours, that many of the Constantinopolitan Emperours were called *Porphyrogenites*, because at their first coming into the world they were wrapt in Purple. 1727–41 CHAMBERS *Cycl.*, *Porphyrogenitus*, in antiquity, an appellation given to the children of the eastern emperors...Cedrenus will have the word to signify, *born in the purple palace*, or the *palace of porphyry*, a palace so called in Constantinople; wherein the empresses used to lie in. Others derive the appellation hence, that the imperial children, as soon as born, were wrapped in purple; others..., that the chamber wherein they were born was hung with purple hangings. 1788 GIBBON *Decl. & F.* (1790) IX. xlviii. 57 In the Greek language *purple* and *porphyry* are the same word:..an apartment of the Byzantine palace was lined with porphyry: it was reserved for the use of the pregnant empresses: and the royal birth of their children was expressed by the appellation of *porphyrogenite*, or born in the purple...This peculiar surname was first applied to Constantine the seventh. 1831 SCOTT *Ct. PALGRAVE *Norm. & Eng.* II. iii. 210 Henry, the Porphyrogenitus, though a younger son relatively to Otho, was the eldest son of royal blood, first born after the accession of Duke Henry to the Throne of Charlemagne. 1893 *Athenæum* 11 Feb. 184/2 The kind of fun which is to be got out of bringing the porphyrogenitus of the English aristocracy face to face with all that is most modern in the American democracy.

Hence **Porphyroge·nitism,** the doctrine of succession in a royal family which prefers a son born after his father's accession to one born before that event; **Porphyroge·niture,** the condition of being born 'in the purple' (see above).

1857 SIR F. PALGRAVE *Norm. & Eng.* II. 210 The doctrine of Porphyrogenitism, congenial to popular sentiment and not without some foundation in principle, prevailed influentially and widely in many countries and through many ages. *a* 1859 DE QUINCEY *Posth. 1. The word used to render L. *porphyrītēs*, Gr. *πορφυρίτης*, the name given to a beautiful and very hard rock anciently quarried in Egypt, composed of crystals of white or red plagioclase felspar embedded in a fine red ground-mass consisting of hornblende, plagioclase, apatite, thulite, and withamite, the last two being bright red in colour. By modern poets often used vaguely, in the sense of a beautiful and valuable purple stone taking a high polish, including red granite and marble.

The site of the ancient quarries, after being long lost, was discovered by Burton and Wilkinson at Gebel Dokhân, near the Red Sea, in lat. 27° 20′ N.

In It., *porfido nero*, *porfido verde*, were applied to black and green rocks of porphyritic structure obtained from Sardinia, Greece, and elsewhere, and these have been englished as *black* and *green porphyry*.

3. *Geol.* and *Min.* a. A rock consisting of a compact base of felspathic or other unstratified rock containing scattered crystals of felspar of contemporary age.

1796 KIRWAN *Elem. Min.* (ed. 2) I. 349 Any stone which in a siliceous or argillaceous ground, or basis, contains scattered specks, grains, or dots of felspar,..is at present denominated a *porphyry*. 1813 Sir H. DAVY *Agric. Chem.* iv. (1814) 193 Porphyry..consists of crystals of felspar. 1833 LYELL *Princ. Geol.* III. Gloss. 77 *Porphyry*..is hence applied to every species of unstratified rock, in which detached crystals of felspar are diffused through a base of other mineral composition. 1839 URE *Dict. Arts, Porphyry*, is a compound mineral or rock, composed essentially of a base of hornstone, interspersed with crystals of felspar. 1869 BRISTOW tr. *Figuier's World bef. Deluge* ii. 33 True porphyry presents a paste essentially composed of compact felspar. 1876 PAGE *Adv. Text-bk. Geol.* vii. 134 The porphyry of the mineralogist consists of a reddish felspar basis with disseminated crystals.

b. In more general sense: Any unstratified or igneous rock having a homogeneous base in which crystals of one or more minerals are disseminated.

Variously specified as *felspar porphyry* (= a), *basaltic, claystone, granitic, greenstone, hornstone, mica, pitchstone, trachytic porphyry*, etc. *Quartz porphyry* has as groundmass an intimate mixture of orthoclase and quartz, containing distinct crystals or large grains of quartz.

The name is sometimes applied even to rocks in which the porphyritic crystals are absent. Many limitations or definitions of the term have been proposed by modern mineralogists, continental and British, but without any general agreement as to the basis of definition: see, in English, Sir A. Geikie *Text-bk. Geol.* (ed. 1885) 149, Prof. Bonny in *Proc. Geol. Soc.* (1886) XLI. 72, Harper *Petrology for Students* (ed. 1902) 126, etc.

1813 BAKEWELL *Introd. Geol.* (1815) 119 The term porphyry is very vague, being applied to all rocks that have a compact base or ground in which crystals of any kind are imbedded and distinctly visible. 1838 LYELL *Elem. [*Note.* The extension of the sense 'haven' or 'harbour-town' to an inland town presents difficulties, though an explanation has been sought in the definition of L. *portus*, in the *Digest* L. xvi. (*De verb. signif.*) 59 'Portus appellatus est conclusus locus, quo importantur merces et inde exportantur; eaque nihilo minus statio est conclusa atque munita'. The transference of sense from 'gate' to 'walled town with gates' is also unlikely. Inasmuch as Port[1] and Port[3], though representing respectively L. *portus* and *porta*, were both masc. in OE., the fact that this *port* was also masc. affords no evidence either way. The MFl. words are in a similar position: there *port* 'haven' and *porte* (later *poort*) 'gate' are both fem., and, *port* 'town' being also fem., the gender gives no indication. But the oldest and prevalent furm of the word was *port* or *poort*, *porte* being unusual and late, and prob. due to confusion with *porte* 'gate'; Verwijs and Verdam take it therefore as certain that *port* 'town' represented L. *portus*; and if this was so in Flemish, it was doubtless so also in OE. The Netherlandish word was extensively used down to *c* 1500, and had numerous derivatives (of which *poorter* citizen, *poort-* or *poorterregt* burgess-ship, citizenship, are still in use). Cf. also Portery.]

(in form identical with Port *sb.*[1]), in several instances also rendering L. *porticus* porch, whence also OE. *portic*, OHG. *pforzih*. ON. had also *port*, perhaps from OE. If the OE. *port* survived into ME. (which is doubtful), it was then merged in the Fr. word, which became in Sc. the ordinary word for the gate of a town or city.]

Port (pōɔ1t), *sb.*[6] (*a.*) *Naut.* [Derivation obscure; see Note below.]

1. The left-hand side of a ship looking forward: = Larboard *sb.* Opposed to Starboard. (Often in phr. *to port*, A-port.)

In recent times generally substituted for the older *larboard* to obviate misunderstandings arising from the similarity in sound of *starboard* and *larboard*. By international convention, ships, esp. steamers, carry a red light on the port side.

1625–44 Manwayring *Sea-mans Dict.*, *To Port.* Is a word used in Conding the Ship,..they will use the word steddy a-Port, or Steddy a Star-boord, the Ship heeles to Port: bring things neere to port, or the like. 1633 T. Stafford *Pac. Hib.* III. viii. (1821) 562 With two takles hee might steere the Hoy either to Starboard or to Port. 1748 *Anson's Voy.* I. x. 104 The ship heeled .. two streaks to port. 1813 Southey *Nelson* I. iii. 124 They..put the helm a-port, and stood after her again. 1844 *Admlty. Order* 22 Nov., The word 'Port' is frequently..substituted..for the word 'Larboard', and as..the distinction between 'Starboard' and 'Port' is so much more marked than that between 'Starboard' and 'Larboard', it is their Lordships direction that the word 'Larboard' shall no longer be used. 1846 *U.S. Navy Department Notice* 18 Feb., It having been repeatedly represented to the Department that confusion arises from the use of the words 'larboard' and 'starboard' in consequence of their similarity of sound, the word 'port' is hereafter to be substituted for 'larboard'. 1875 Bedford *Sailor's Pocket Bk.* iii. (ed. 2) 61 If two sailing ships are meeting end-on,..so as to involve risk of collision, the helms of both shall be put to port, so that each may pass on the port side of the other. 1884 *Pall Mall G.* 25 Aug. 8/2 The..port bow of the *Camden* struck the port of the *Dione* between her rigging.

2. *attrib.* or as *adj.* Situated on, or turned towards the left side of a ship: = Larboard B.

1857 R. Tomes *Amer. in Japan* vii. 149 It was thought better to stand off on the port tack, in order to get well clear of the land. 1857 Dufferin *Lett. High Lat.* (ed. 3) 226 A promising opening was reported .. a mile or so away on the port-bow. 1875 Bedford *Sailor's Pocket Bk.* i. (ed. 2) 21 The Port Wing Ship of a Column is the ship on its extreme left. 1883 *Law Times Rep.* XLIX. 332/1 The *Clan Sinclair*..was about to round Blackwall Point under a port helm. *Mod.* A green light seen on your port bow shows that a vessel is approaching on your left front on a transverse course (the green light being shown from the starboard side of that vessel).

[Note. This use of *port* may have arisen either from Port *sb.*[1], senses 1, 2, or from Port *sb.*[2], sense 2. When the steering apparatus was on the right side of the vessel (the *steerboard* or *starboard*), it would be convenient, in order to leave this free, to have the *port* (entering port) on the opposite side (the *lade board* or *larboard*). For the same reason, the vessel when in port, would naturally be placed so as to lie with her larboard alongside or facing the shore or port. For either reason, the larboard would be the port side. *Port* for *larboard* was in recorded use more than two centuries before it became official; the existence of Port *v.*[2] indicates a still earlier colloquial use.]

Porte (pōːɹt). Also 6–8 port. [a. F. *porte*, in full *la Sublime Porte* = It. *la Porta Sublima*, transl. Turkish (Arabic) باب عالي *bāb-i-ʿāliy*, lit. 'the sublime, high, or lofty gate', the official title of the central office of the Ottoman government, comprising the office of the Grand Vezir, of the Minister of Foreign Affairs, and of the Council of State (Redhouse, *Turkish Lex.* 1890). 'Gate' is supposed to refer to the ancient place of audience, etc., at the gate of the tent, or the king's gate; the attribute 'high' or 'lofty' is not literal, but the honorific attribute of the Turkish government. According to Zenker, the Western application of 'Sublime Porte' to the Turkish government or Ottoman state answers rather to the Turkish *dawlet-i-ʿāliye*, 'the sublime empire or state.'
